

RESEARCH PAPERS

Click the title below to view documents!

1. A Bonded Phase Extraction Procedure For The Separation Of Benzodiazepines From Tricyclic Antidepressants.
2. An Automated Solid Phase Extraction Method for Thebaine, 6-Acetylmorphine and Other Opiates in Urine.
3. The Alklation of Drug at Ion Exchange Sites on the Surface of Solid Phase Extraction Columns.
4. The Quantitation of Barbiturates in Human Urine By GC-MSD with an Automated Solid Phase Extraction System.
5. Bonded Phase Extraction of Fentanyl in Biological Fluids.
6. Clonazepam and 7-Aminoclonazepam Solid Phase Extraction Procedure.
7. A Comparative Study of The Extraction Capabilities of Various Substituted Silic as Used in Bonded Phase Extraction.
8. Copolymeric Bonded Phase Extraction of Compounds from Biological Matrices
9. Determination of Δ^9 -Tetrahydrocannabinol (THC) and It's Metabolite 11-NOR- Δ^9 -THC-9-Carboxylic Acid (THCA) in Whole Blood.
10. Flunitrazepam, 7-Aminoflunitrazepam and Desmethyflunitrazepam Solid Phase Extraction Procedure.
11. Fluoxetine and Norfluoxetine Analysis Using Solid-Phase Extraction and GC/MS Detection.
12. Reduced Solvent Volume (RSV) Extraction Columns.
13. SPE Opiate Procedure with Oxime / TME Derivative.
14. SPE Method for The Determination of Gamma-Hydroxybutyrate (GHB) in Urine Without Conversion to Butyrolactone (GBL).
15. Solid Phase Extraction Methods for the Determination of Drugs used to Faciliate Sexual Assault.
16. A Simple Method for Derivatizing the Surface of Silica Gel with Aldehyde Groups by Employing A New Alkoxy Aldehyde Silane.
17. Principles of Solid-Phase Extraction on Multimodal Copolymeric Bonded Phases and Application for Novel High-Flow Sorbents.
18. XtrackT[®] Bonded Phase Extraction Columns Designed For Testing of Drugs of Abuse in Sports.
